# SPECIFICATIONS FOR SOFTWARE DEVELOPERS

# **ACADEMIC YEAR 2004-2005**

**VERSION 1.0**

# **Summary of Updates**

<b>Revision Date</b>	Changes
9/01/03	Draft specifications issued.
	-

The processing edits included in this specification package have been developed using a priority processing logic. Some steps in the process are contingent upon or use data from previous steps. It is therefore necessary that the processing edits be performed in the sequence in which they are presented in these specifications. That sequence is as follows:

- 1. Valid Field Definitions (11 pages)
- 2. Model Determination (5 pages)
- 3. Complete Assumptions (13 pages)
- 4. Simplified Needs Test (4 pages)
- 5. Complete Reject Edits (9 pages)
- 6. Determination of Formula Type (4 pages)
- 7. Expected Family Contribution Formula Calculation (43 pages)
- 8. Alternate EFC Calculations (6 pages)

All edits or formula steps that are additions or revisions to the prior year's specifications have been marked with an exclamation mark (!) next to the edit number, step, or field.

All values that are variables, and subject to change during the year, are marked with an @.

Unless otherwise specified, all calculations should be carried to 3 decimal places and then rounded to the nearest whole number (upward from .500 and downward from .499).

For example, 4.500 would be rounded to 5; 4.499 would be rounded to 4; -4.500 would be rounded to -5.

Do not process applications dated prior to 1/1/2004.

The Department of Education will provide a test file for use by each servicer in self-testing of their system. Expected results will be included on the file for 100% of the test cases. The Department is not testing or certifying systems for 2004-2005 and therefore will not accept test results for review.

The test data will be provided in Social Security Number (SSN) order and in the 2004-2005 Institutional Student Information Record (ISIR) format. The ISIR record layout is included in the Appendix following the specifications.

If you have questions related to the specifications package or the test data, please call Dan Staples, ORC Macro International, at (301) 572-0272, or e-mail at Daniel.A.Staples@orcmacro.com.

For the 2004-2005 cycle, there are several significant changes to the specifications. All changes to edits, text or formula steps are marked with an exclamation mark (!). All tables in the formulas have been updated to account for inflation. The following is a general summary of the substantive changes that have been made to each section of the specifications.

The result of completing the model determination edits is to determine if applicants are dependent on their parents for financial support or if they can be considered independent from their parents. The determination of dependency status is critical to the rest of the application process; therefore, it is essential to perform this step first.

When performing the following edits to determine model, use reported data only. No assumptions should be made except those included in these edits. If multiple responses are given for a data element, set the field to blank.

Invalid date of birth is defined as follows:

- Month is less than 01 or greater than 12
- Day is out of following range:

# Month Valid Day Range

01	01-31
02	01-28 (unless year is divisible by 4 when 01-29 is valid)
03	01-31
04	01-30

The specifications in this section define which EFC formula should be used for the primary or secondary calculations.

Two calculations, a primary and a secondary, will be performed if an applicant has met the simplified needs test and has reported supplemental data that matches their model.

For dependent applicants, supplemental data is defined as follows:

Parents'/Student's Cash, Savings and Checking, Parents'/Student's Real Estate/Investment Net Worth, Parents'/Student's Business/Farm Net Worth.

For independent applicants, supplemental data is defined as follows:

Student's Cash, Savings and Checking, Student's Real Estate/Investment Net Worth, Student's Business/Farm Net Worth.

When the simplified needs test is met, the simplified calculation will always be the primary number.

If the automatic zero EFC flag is set to Y, set the primary EFC to 0 (calculate formula type, Total Income (TI), Student Total Income (STI) and FISAP Total Income (FTI) only and carry on the record). Do not calculate a secondary EFC.

For all other records, calculate the primary EFC and secondary EFC as described below.

#### Primary EFC

If the simplified needs test is met.

Use the simplified calculation

(formula type 4, 5, or 6).

If the simplified needs test is not met.

Use the full data calculation

(formula type 1, 2, or 3).

Secondary EFC

If the simplified needs test is met

and the supplemental data has been

completed

Use the full data calculation (formula type 1, 2, or 3).

#### 2004-2005 EFC Formula Specifications

## **Guidelines for Computations**

- 1. Use the amounts assumed as values for the fields referred to. If no amount is assumed, use the reported amount.
- 2. If any field referred to is blank and has no assumed value, use zero for computation purposes.
- 3. Set any negative amounts on the input data to zero for computation purposes.
- 4. Unless otherwise specified, all calculations should be carried to 3 decimal places and then rounded to the nearest whole numbers (upward from .500 and downward from .499). Rounding should be performed after each calculation in the formula. The intermediate value that is the result of each step will not have any decimal digits.

For example, 4.5 would be rounded to 5; 4.499 would be rounded to 4; -4.5 would be rounded to -5.

#### EFC FORMULA #1 - DEPENDENT

#### STEP 1: Total Income (TI)

If parents' tax filing status is tax filer, then sum the following parents' data:

(Parents' AGI + Income From Worksheet A + Income From Worksheet B) - Income From Worksheet C = TI

If parents' tax filing status is non-tax filer, then sum the following parents' data:

(Father's Income + Mother's Income + Income From Worksheet A + Income From Worksheet B) - Income From Worksheet C = TI

## STEP 2: Allowances Against Total Income (ATI)

! a) State and Other Tax Allowance (STX):

Appropriate rate from table = ST%

Use Parents' State of Legal Residence. If blank or invalid, use Student's State of Legal Residence. If both fields are blank or invalid, use Mailing State. If all three fields are blank or invalid, use rates for blank or invalid State.

## 2004-2005 State and Other Tax Allowance

**SST Calculation Table** 

Income Social Security Tax

0 - 87,000 7.65% of income

87,001 or greater 6,655.50 + 1.45% of amount over 87,000

FSST + MSST = SST

SST will never be less than zero.

## ! c) Income Protection Allowance (IPA):

Value from table = PIPA (Preliminary IPA)

Family Size (including studen	t)	Paren	ts' Number in Co	ollege	
( 1 111 8 111 11	1	2	3	4	5
2	13,700	11,350

6	29,070	26,730	24,400	22,060	19,730

For each additional family member add 3,280. For each additional college student subtract 2,330.

\_\_\_\_\_\_

If Parents' Number in College is 5 or less, IPA = PIPA.

If Parents' Number in College is 6 or more, IPA = PIPA for 5 in college - (2,330 x (Parents' Number in College - 5)).

NOTE: IPA will never be less than zero.

d) Employment Allowance (EA):

If Parents' Marital Status is "married" and:

- 1) Father's Income and Mother's Income are both greater than zero, then .35 x (the lesser of Father's Income or Mother's Income) = EA
- 2) Father's Income and Mother's Income are not both greater than zero, 0 = EA.

If Parents' Marital Status is "single", "separated/divorced", or "widowed" and:

- 1) One of Father's Income or Mother's Income is greater than zero, then .35 x Father's Income or Mother's Income (whichever is greater than zero) = EA.
- 2) Neither Father's Income nor Mother's Income is greater than zero, then 0 = EA.

If EA is greater than 3,000, set to 3,000.

NOTE: EA will never be less than zero.

e) If parents' tax filing status is tax filer:

Parents' Taxes Paid 
$$+$$
 SST  $+$  STX  $+$  EA  $+$  IPA  $=$  ATI

If parents' tax filing status is non-tax filer:

$$SST + STX + EA + IPA = ATI$$

STEP 3: Available Income (AI)
